

Mathematics summer task: Information

If you did not attend induction you need to contact Mr Wray to be registered or added on Samuel Whitbread's DrFrost account.

kwrap@bestacademies.org.uk

If you are having problems with your account password email Mr Wray

The tasks will be administered through our Samuel Whitbread DrFrost subscription.

There will be 5 tasks set over the duration of the summer, with the final submission due when you return in September. The content is all based on the GCSE curriculum for the higher tier. The idea of a staged setting is that you do not attempt to do all the tasks in one week. Staying fluent in your understanding of maths will require spreading work over the weeks you are away. You do not need to do the work in the week it was set, and there are weeks at the end to allow for weeks when you were on holiday or otherwise unavailable.

Before start of summer: 17th July, "Y11to12 Changing the subject" and "Y11to12 Straight lines", due 4th September

Start of Summer: 24th July, "Y11to12 Quadratics", due 4th September

One week into Summer: 31st July, "Curves", due 4th September

Two weeks into Summer: 7th August, "Y11to12 Indices and surds", due 4th September
