

SWA Geography Year 8 Summer Challenge

- Watch a **film or documentary** that has a geographical theme in it such as San Andreas (earthquakes – causes and threats) or Frozen Planet (ecosystems – climate and adaptations).
- Complete some **research** into it's theme and produce a full page summary of the geography.
- For example, research the San Andreas fault line.
What type of plate boundary is it? What risks to humans are there? When might it happen?
 - Don't forget to include some **pictures, maps and diagrams!**
